

Plungers

Type K 28 LO

Plunger for use with Fischbach threaded cartridge E 280.

As a standard plunger, suitable for most sealants and for machine processing. The domed plunger floor makes it possible to operate the plunger without creating air pockets. Lips angled inwards cause the plunger to become enlarged when dispensing. This ensures that the cartridge is properly emptied, even with viscous materials.

Mechanical and pneumatic dispensing devices can be used for dispensing.

TECHNICAL SPECIFICATIONS

Material:	HDPE
Wall thickness:	1,3 mm
Weight:	5,9 g
Packaging unit:	1400 pieces/box

Technical changes reserved.
